

Mariana Islands Training and Testing Supplemental EIS/OEIS Available for Public Review and Comment

The Department of the Navy, including both the U.S. Navy and U.S. Marine Corps; the U.S. Air Force; the U.S. Army; and the U.S. Coast Guard (collectively referred to as “Action Proponents”) have prepared a supplement to the 2015 Mariana Islands Training and Testing (MITT) Environmental Impact Statement (EIS)/Overseas EIS (OEIS) and the 2020 MITT Supplemental EIS (SEIS)/OEIS to assess the potential environmental effects associated with the Proposed Action to continue military readiness activities at sea and on Farallon de Medinilla (FDM) within the MITT Study Area. Military readiness activities include training, testing, and range modernization and sustainment. The purpose of the Proposed Action is to ensure the Action Proponents can organize, train, and equip service members and personnel to meet their respective national defense missions.

OUTREACH MEETINGS

The Action Proponents value the strong relationships built over many years with government officials and residents of Tinian and Rota. Outreach meetings will be held to provide information about the project and answer questions about the Proposed Action and environmental analysis. Comments will be accepted in writing at the outreach meetings.
